History of Valmoural

The history of Valmoural dates back to 1950, when Manuel da Cunha Azevedo founded the company, originally named "Manuel da Cunha Azevedo e Herdeiros." At that time, hive production was carried out in a small workshop, with handcrafted work focused on manual carpentry. This dedication marked the beginning of a journey that would transform the company into one of the leading references in the beekeeping sector in Portugal.

With the growth of national beekeeping and the increasing demand for its products, the need to expand the company arose. In 1980, the company moved to new facilities with 3,000 m² in Vale Moural, which were modernized with advanced equipment. A few years later, in 1985, a stainless steel production line was installed, demonstrating a commitment to innovation. In 1995, the facilities were expanded to 4,000 m², consolidating the company's production capacity.

Throughout its journey, Valmoural participated in international events, such as the 35th Apimondia in Antwerp in 1997, and developed beekeeping modernization projects in foreign markets, such as in Libya, between 2001 and 2003. In 2005, the company was restructured as a limited liability company, adopting the name "Valmoural Material Apícola, Lda.", while still honoring its history and traditions.

Between 2012 and 2017, Valmoural implemented important initiatives under the Portugal 2020 program and was distinguished in 2015 as a PME Líder, a recognition for its performance and contribution to the Portuguese economy.

In 2025, Valmoural celebrates 75 years of experience in the beekeeping sector, a trajectory marked by innovation, dedication, and commitment to its clients, reaffirming its position as a reference in both the national and international markets.

Where beekeeping takes shape for 75 years.

Founded in 1950 by Manuel da Cunha Azevedo as "Manuel da Cunha Azevedo e Herdeiros". Initially, hive production was done in a small workshop with handcrafted carpentry.

Installed a stainless steel production line.

Participated in international events, such as the 35th Apimondia in Antwerp (Apimondia Centennial Edition).

Rebranded to "Valmoural Material Apícola, Lda."

PME Líder distinction, recognizing Valmoural's performance and contribution to the national economy.

Expanded to a new facility with 3,000 m² in Vale Moural, with modernized equipment.

Expanded facilities to 4,000 m².

Contributed to apiculture modernization projects in Libya

Implemented projects under Portugal 2020

Celebration of 75 years of experience in the beekeeping sector, marking a trajectory of innovation, dedication and commitment to customers.

FEIRA DE MELIZA | ZAMORA

Production and Products

Currently, Valmoural is recognized as one of the largest companies in the beekeeping sector in Portugal. The company manufactures a wide range of beekeeping equipment, including:

- **Beekeeping Hives**
- **Manual and Electric Extractors**
- **Presses**
- **Honey Containers**
- **Feeders**
- **Smokers**

All products are developed with high-quality materials, complying with European Union standards and customer requirements. The commitment to excellence has been a differentiator that positions Valmoural as a market leader.

International Expansion

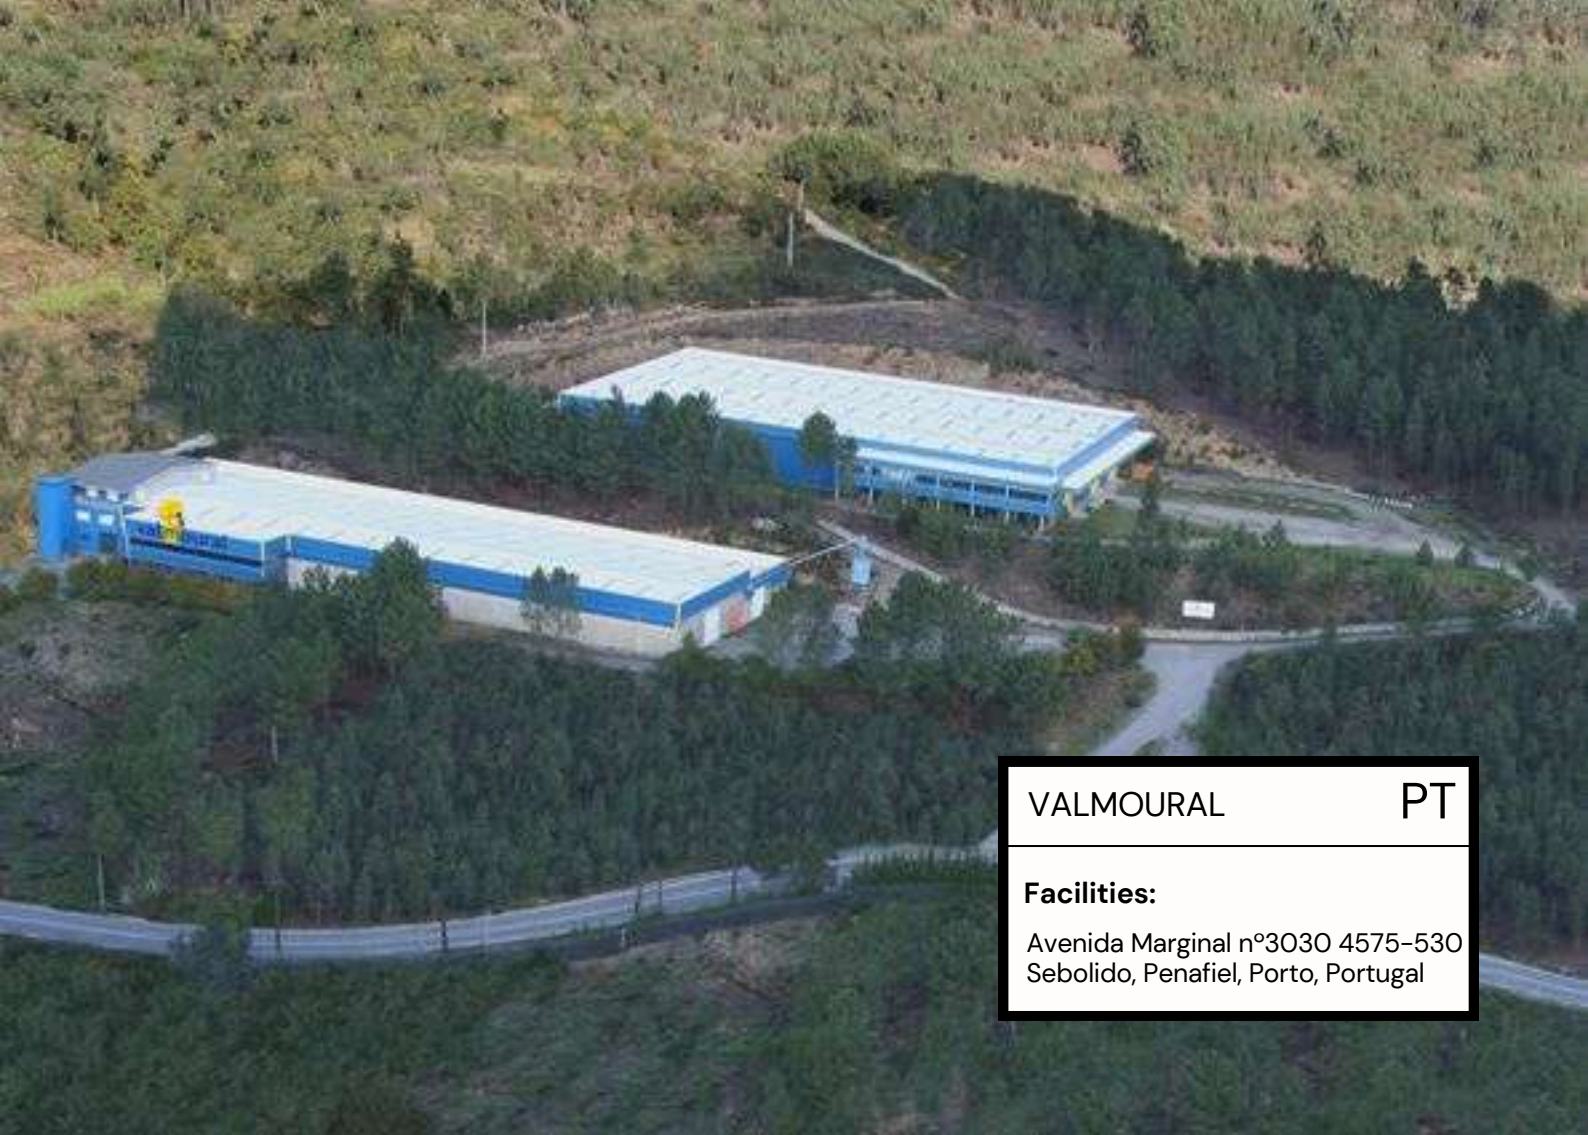

Although the domestic market remains important, Valmoural has embraced an internationalization strategy that has significantly increased its business volume. Currently, the company exports to several countries, including:

- **Spain**
- **Italy**
- **France**
- **Germany**
- **Switzerland**
- **Angola**
- **Mozambique**
- **Guinea**
- **United States**
- **Libya**

This geographical diversification strengthens Valmoural's position and expands growth opportunities.
